Water Tanks

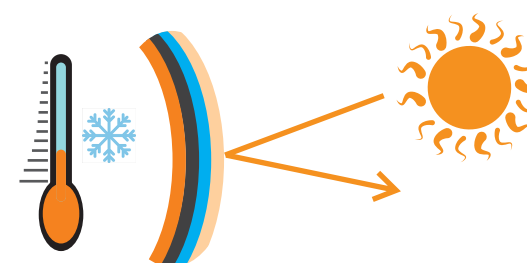

Available in 2 models

Dura: Is a 3 layer Water Storage Tank with High ESCR (Environmental Stress Crack Resistance). This makes the tank strong, durable and long-lasting. Made with food grade material, free from heavy metals and assured Anti-Microbial properties, it is an ideal choice for clean and safe water.

Dura Cool: A tank for the discerning and quality conscious. It is a 4 layer Anti-Microbial Water Storage Tank with High ESCR (Environmental Stress Crack Resistance) and premium insulation PUF. The insulation PUF acts as a protective layer that keeps the water temperature cooler and thereby ensures comfort and durability.

Cross section of tank construction

Strong outer layer for durability

UV protection layer

Anti Microbial layer with GermGuard
